

Custom Copper-Tube & Aluminum-Fin Coils

Commercial | Industrial | OEM | Replacement HVAC

Custom copper-tube and aluminum-fin coils configured for thermal performance, reliable fit, and integration into commercial, industrial, OEM, retrofit, and mission-critical HVAC systems.

KEY FEATURES

- Custom face dimensions and connection locations
- Multiple fin-spacing and casing options
- Corrosion-resistant treatments available
- Application-specific circuiting and tube patterns
- Copper tubes and aluminum-fin construction
- OEM and retrofit matching capabilities

AVAILABLE COIL TYPES

Chilled & Hot Water	Air-handler heating and cooling
DX Evaporator	Refrigerant-based cooling
Condenser	Air-cooled heat rejection
Steam	Industrial and institutional heating
Glycol	Freeze-protected heat transfer
Replacement & OEM	Equipment-specific replacements

APPLICATIONS & ENGINEERING OPTIONS

Coils are configured around the equipment, operating conditions, thermal requirements, project schedule, and connection locations. Applications include air handlers, rooftop units, refrigeration equipment, process systems, data centers, and replacement projects.

CONSTRUCTION OPTIONS

Tubes	Copper; multiple tube diameters; custom tube patterns
Fins	Aluminum; coated aluminum; custom fin spacing
Casings	Galvanized steel; stainless steel; aluminum
Protection	E-coat; epoxy coatings; corrosion-resistant treatments

EQUIPMENT SELECTION

Provide drawings, specifications, dimensions, equipment details, operating data, or site photos. Teller Industries reviews materials, fit, circuiting, connections, and required thermal performance before coordinating production and delivery.

Final dimensions, performance, construction, and availability depend on the approved application-specific design. Images are representative; confirm final specifications with Teller Industries.
